according to Regulation (EC) No. 1907/2006 (REACH)

#### **Greinox POLISH**

#### **SECTION 4: First aid measures**

4.1 Description of first aid measures

#### General notes

Take off immediately all contaminated clothing. Self-protection of the first aider.

#### Following inhalation

Provide fresh air. In all cases of doubt, or when symptoms persist, seek medical advice. **Following skin contact** 

Rinse skin with water/shower. In all cases of doubt, or when symptoms persist, seek medical advice. Following eye contact

In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Protect uninjured eye.

#### **Following ingestion**

Rinse mouth immediately and drink plenty of water. Rinse mouth with water (only if the person is conscious). Call a physician immediately. If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects).

#### 4.2 Most important symptoms and effects, both acute and delayed

Following inhalation: Cough, pain, choking, and breathing difficulties, Following skin contact: Causes severe burns, Causes poorly healing wounds, After eye contact: Causes burns, Risk of serious damage to eyes, Risk of blindness, Following ingestion: Vomiting, Corrosion, Gastric perforation

**4.3 Indication of any immediate medical attention and special treatment needed** None

\_\_\_\_\_

#### **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

#### Suitable extinguishing media

Co-ordinate fire-fighting measures to the fire surroundings water spray, foam, dry extinguishing powder, carbon dioxide  $(CO_2)$ 

### Unsuitable extinguishing media water jet

5.2 Special hazards arising from the substance or mixture Not combustible. Hazardous combustion products

Phosphorus oxides (PxOy)

5.3 Advice for firefighters

In case of fire and/or explosion do not breathe fumes. Fight fire with normal precautions from a reasonable distance. Wear self-contained breathing apparatus. Wear full chemical protective clothing.

#### **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

#### For non-emergency personnel

Use personal protective equipment as required. Avoid contact with skin, eyes and clothes. Do not breathe vapour/spray.

according to Regulation (EC) No. 1907/2006 (REACH)

#### **Greinox POLISH**

#### 6.2 Environmental precautions

Keep away from drains, surface and ground water. The product is an acid. Before discharge into sewage plants the product normally needs to be neutralised.

### 6.3 Methods and materials for containment and cleaning up Advices on how to contain a spill Covering of drains. Advices on how to clean up a spill Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Other information relating to spills and releases Place in appropriate containers for disposal. 6.4 Reference to other sections

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section13. Indications about waste treatment see section 13.

#### \_\_\_\_\_

#### SECTION 7: Handling and storage

#### 7.1 Precautions for safe handling

Handle and open container with care. Clear contaminated areas thoroughly.

#### Advice on general occupational hygiene

Wash hands before breaks and after work. Keep away from food, drink and animal feedingstuffs.

#### **7.2 Conditions for safe storage, including any incompatibilities** Keep container tightly closed. Store in a dry place. Hygroscopic.

Incompatible substances or mixtures Observe hints for combined storage. Protect against external exposure, such as humidity Consideration of other advice

#### Ventilation requirements

Use local and general ventilation.

#### • Specific designs for storage rooms or vessels

Recommended storage temperature: 15 – 25 °C.

#### 7.3 Specific end use(s)

No information available.

#### SECTION 8: Exposure controls/personal protection

#### 8.1 Control parameters

#### National limit values

#### **Occupational exposure limit values (Workplace Exposure Limits)**

| Country  | Name of agent           | CAS No    | Notation | Identifier |  | TWA<br>[mg/m³] |  | STEL<br>[mg/m <sup>3</sup> ] | Source      |

#### 8.2 Exposure controls

Individual protection measures (personal protective equipment) Eye/face protection

Use safety goggle with side protection.

Skin protection

#### hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. The times are approximate values from measurements at 22 ° C and permanent contact. Increased temperatures due to heated substances, body heat etc. and a reduction of the effective layer thickness by stretching can lead to a considerable reduction of the breakthrough time. If in doubt, contact manufacturer. At an approx. 1.5 times larger / smaller layer thickness, the respective breakthrough time is doubled / halved. The data apply only to the pure substance. When transferred to substance mixtures, they may only be considered as a guide.

#### • type of material

NBR (Nitrile rubber)

#### material thickness

>0,3 mm

#### • breakthrough times of the glove material

>480 minutes (permeation: level 6)

#### other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended.

#### **Respiratory protection**

Respiratory protection necessary at: Aerosol or mist formation. Type: B-P2 (combined filters for acidic gases and particles, colour code: Grey/White). Usually no personal respirative protection necessary.

according to Regulation (EC) No. 1907/2006 (REACH)

#### **Greinox POLISH**

#### **Environmental exposure controls**

Keep away from drains, surface and ground water.

#### **SECTION 9: Physical and chemical properties**

|     | Corrosive to metals   | category 1: corrosive to metals |  |  |  |  |

hazard classes: Corrosive to metals **Other safety characteristics:** Miscibility

category 1: corrosive to metals

completely miscible with water

#### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

Substance or mixture corrosive to metals.

#### **10.2 Chemical stability**

The material is stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

#### 10.3 Possibility of hazardous reactions

**Violent reaction with:** Aldehydes, Alkali (lye), Alkali metals, Ammonia (NH3), Bromates, Carbide, Chlorates, Alkaline earth metal, Halogenated hydrocarbons, Metals, Metal powder, Nitrate, Nitriles, Nitro compound, Organic substances, Perchlorates, Permanganates, Peroxides, Phosphorus, Phosphorus oxides (e.g.  $P_2O_5$ ), Acids, Strong alkali, Water, Hydrogen peroxide

#### 10.4 Conditions to avoid

There are no specific conditions known which have to be avoided.

#### 10.5 Incompatible materials

different metals **Release of flammable materials with** Metals, Light metals (due to the release of hydrogen in an acid/alkaline medium)

according to Regulation (EC) No. 1907/2006 (REACH)

#### **Greinox POLISH**

#### 10.6 Hazardous decomposition products

in the event of fire: See section 5.

### SECTION 11: Toxicological information

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Test data are not available for the complete mixture.

#### **Classification procedure**

The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

#### Classification according to GHS (1272/2008/EC, CLP)

Acute toxicity

Harmful if swallowed.

#### • Acute toxicity of components of the mixture

| Name of substance     | CAS No    | Exposure<br>route | Endpoint | Value              | Species |
|-----------------------|-----------|-------------------|----------|--------------------|---------|

| ortho-Phosphoric acid | 7664-38-2 | oral              | LD50     | 1.530 mg/kg        | rat     |
| ortho-Phosphoric acid | 7664-38-2 | dermal            | LD50     | 2.740 mg/kg        | rabbit  |

#### Acute toxicity estimate (ATE) of components of the mixture

| Name of substance     | CAS No    | Exposure route | ATE        |
|-----------------------|-----------|----------------|------------|
| ortho-Phosphoric acid | 7664-38-2 | oral           | >300 mg/kg |

#### Skin corrosion/irritation

Causes severe skin burns and eye damage.

Serious eye damage/eye irritation

Causes serious eye damage.

#### Respiratory or skin sensitisation

Shall not be classified as a respiratory or skin sensitiser.

#### Summary of evaluation of the CMR properties

Shall not be classified as germ cell mutagenic, carcinogenic nor as a reproductive toxicant

#### • Specific target organ toxicity - single exposure

Shall not be classified as a specific target organ toxicant (single exposure).

#### • Specific target organ toxicity - repeated exposure

Shall not be classified as a specific target organ toxicant (repeated exposure).

#### Aspiration hazard

Shall not be classified as presenting an aspiration hazard.

#### Symptoms related to the physical, chemical and toxicological characteristics

#### If swallowed

If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects) • If in eyes

causes burns, Causes serious eye damage, risk of blindness

#### If inhaled

cough, pain, choking, and breathing difficulties

#### If on skin

causes severe burns, causes poorly healing wounds

#### Other information

none

#### 11.2 Endocrine disrupting properties

None of the ingredients are listed.

according to Regulation (EC) No. 1907/2006 (REACH)

#### Biodegradation

The methods for determining the biological degradability are not applicable to inorganic substances.

#### 12.2 Process of degradability

Data are not available.

- **12.3 Bioaccumulative potential** Data are not available.
- **12.4 Mobility in soil** Data are not available
- **12.5 Results of PBT and vPvB assessment** Data are not available.
- **12.6 Endocrine disrupting properties** None of the ingredients are listed.
- **12.7 Other adverse effects** Data are not available.

\_\_\_\_\_

#### **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

This material and its container must be disposed of as hazardous waste. Dispose of contents/container in accordance with local/regional/national/international regulations.

#### Sewage disposal-relevant information

Do not empty into drains.

#### Waste treatment of containers/packaging

It is a dangerous waste; only packaging which are approved (e.g. acc. to ADR) may be used.

#### 13.2 Relevant provisions relating to waste

The allocation of waste identity numbers/waste descriptions must be carried out according to the EEC, specific to the industry and process. Waste catalogue ordinance (Germany).

#### 13.3 Remarks

Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities. Please consider the relevant national or regional provisions

according to Regulation (EC) No. 1907/2006 (REACH)

#### Legend

R3 1. Shall not be used in:

- present an aspiration hazard and are labelled with H304.

<sup>-</sup> ornamental articles intended to produce light or colour effects by means of different phases, for example in orna- mental lamps and ashtrays,

tricks and jokes,

<sup>-</sup> games for one or more participants, or any article intended to be used as such, even with ornamental aspects,

<sup>2.</sup> Articles not complying with paragraph 1 shall not be placed on the market.

<sup>3.</sup>Shall not be placed on the market if they contain a colouring agent, unless required for fiscal reasons, or perfume, or both, if they:

can be used as fuel in decorative oil lamps for supply to the general public, and

<sup>4.</sup>Decorative oil lamps for supply to the general public shall not be placed on the market unless they conform to the European Standard on Decorative oil lamps (EN 14059) adopted by the European Committee for Standardisation (CEN).

<sup>5.</sup> Without prejudice to the implementation of other Union provisions relating to the classification, labelling and pack- aging of substances and mixtures, suppliers shall ensure, before the placing on the market, that the following requirements are met:

according to Regulation (EC) No. 1907/2006 (REACH)

#### Greinox POLISH

(a) lamp oils, labelled with H304, intended for supply to the general public are visibly, legibly and indelibly marked as follows: "Keep lamps filled with this liquid out of the reach of children"; and, by 1 December 2010, "Just a sip of lamp oil or even sucking the wick of lamps – may lead to life-threatening lung damage";

(b) grill lighter fluids, labelled with H304, intended for supply to the general public are legibly and indelibly marked by 1 December 2010 as follows: 'Just a sip of grill lighter fluid may lead to life threatening lung damage'; (c) lamps oils and grill lighters, labelled with H304, intended for supply to the general public are packaged in black opaque containers not exceeding 1 litre by 1 December 2010.';

R75 1. Shall not be placed on the market in mixtures for use for tattooing purposes, and mixtures containing any such substances shall not be used for tattooing purposes, after 4 January 2022 if the substance or substances in question is or are present in the following circumstances:

(a) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as carcinogen category 1A, 1B or 2, or germ cell mutagen category 1A, 1B or 2, the substance is present in the mixture in a concentration equal to or greater than 0.00005 % by weight:

0,00005 % by weight;
(b) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as reproductive toxicant category 1A, 1B or 2, the substance is present in the mixture in a concentration equal to or greater than 0,001 % by weight;
(c) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as reproductive toxicant category 1, 1A or 1B, the substance is present in the mixture in a concentration equal to or greater than 0,001 % by weight;
(d) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as skin sensitiser category 1, 1A or 1B, the substance is present in the mixture in a concentration equal to or greater than 0,001 % by weight;
(d) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as skin corrosive category 1, 1A, 1B or 1C or skin irritant category 2, or as serious eye damage category 1 or eye irritant category 2, the substance is present in the mixture in a concentration equal to or greater than:
(i) 0,01 % by weight, in all other cases;
(e) in the case of a substance listed in Annex VI to Regulation (EC) No 1223/2009 (\*1) the substance is present in the mixture in a concentration equal to a greater than:

(e) in the case of a substance listed in Annex II to Regulation (EC) No 1223/2009 (\*1), the substance is present in the mixture in a

(f) in the case of a substance for which a condition of one or more of the following kinds is specified in column g (Product type, Body parts) of the table in Annex IV to Regulation (EC) No 1223/2009, the substance is present in the mixture in a concentration equal to or greater than 0,00005 % by weight: (i) "Rinse-off products";

(ii) "Not to be used in products applied on mucous membranes";
 (iii) "Not to be used in eye products";

(ii) Not to be used in eye products;
(g) in the case of a substance for which a condition is specified in column h (Maximum concentration in ready for use preparation) or column i (Other) of the table in Annex IV to Regulation (EC) No 1223/2009, the substance is present in the mixture in a concentration, or in some other way, that does not accord with the condition specified in that column;
(h) in the case of a substance listed in Appendix 13 to this Annex, the substance is present in the mixture in a concentration equal to or greater than the concentration limit specified for that substance in that Appendix.
2. For the purposes of this entry use of a mixture "for tattooing purposes" means injection or introduction of the mixture into a person's skin, mucous membrane or event here a precedure or precedure or event for the purpose.

person's skin, mucous membrane or eyeball, by any process or procedure (including procedures com- monly referred to as permanent make-up, cosmetic tattooing, micro-blading and micro-pigmentation), with the aim of making a mark or design on his or her body.

3. If a substance not listed in Appendix 13 falls within more than one of points (a) to (g) of paragraph 1, the strictest concentration limit laid down in the points in question shall apply to that substance. If a substance listed in Appendix 13 also falls within one or more of points (a) to (g) of paragraph 1, the concentration limit laid down in point (h) of paragraph 1 shall apply to that substance.
4.By way of derogation, paragraph 1 shall not apply to the following substances until 4 January 2023: (a) Pigment Blue 15:3 (CI 74160, EC No 205-685-1, CAS No 147-14-8);
(b) Pigment Green 7 (CI 74260, EC No 215-524-7, CAS No 1328-53-6).

(b) Pigment Green 7 (CI 74260, EC No 215-524-7, CAS No 1328-53-6). 5.If Part 3 of Annex VI to Regulation (EC) No 1272/2008 is amended after 4 January 2021 to classify or re-classify a sub- stance such that the substance then becomes caught by point (a), (b), (c) or (d) of paragraph 1 of this entry, or such that it then falls within a different one of those points from the one within which it fell previously, and the date of ap- plication of that new or revised classification is after the date referred to in paragraph 1 or, as the case may be, para- graph 4 of this entry, that amendment shall, for the purposes of applying this entry to that substance, be treated as taking effect on the date of application of that new or revised classification.

6. If Annex II or Annex IV to Regulation (EC) No 1223/2009 is amended after 4 January 2021 to list or change the listing of a substance such that the substance then becomes caught by point (e), (f) or (g) of paragraph 1 of this entry, or such that it then falls within a different one of those points from the one within which it fell previously, and the amendment takes effect after the date referred to in paragraph 1 or, as the case may be, paragraph 4 of this entry, that amendment shall, for the purposes of applying this entry to that substance, be treated as taking effect from the date falling 18 months after entry into force of the act by which that amendment was made. 7. Suppliers placing a mixture on the market for use for tattooing purposes shall ensure that, after 4 January 2022, the mixture is marked with the following information: (a) the statement "Mixture for use in tattoos or permanent make-up"; (b) a reference number to uniquely identify the batch;

(c) the list of ingredients in accordance with the nomenclature established in the glossary of common ingredient names pursuant to Article 33 of Regulation (EC) No 1223/2009, or in the absence of a common ingredient name, the IUPAC name. In the absence of a common ingredient name or IUPAC name, the CAS and EC number. Ingredients shall be listed in descending order by weight or volume of the ingredients at the time of formulation. "Ingredient" means any substance added during the process of formulation and present in the mixture for use for tattooing purposes. Im- purities shall not be regarded as ingredients. If the name of a substance, used as ingredient within the meaning of this entry, is already required to be stated on the label in accordance with Regulation (EC) No

1272/2008, that ingredient does not need to be marked in accordance with this Regulation;
 (d) the additional statement "pH regulator" for substances falling under point (d)(i) of paragraph 1;
 (e) the statement "Contains nickel. Can cause allergic reactions." if the mixture contains nickel below the concentration limit

(f) the statement "Contains include calledge reactions." If the mixture contains include below the concentration limit specified in Appendix 13; (g) safety instructions for use insofar as they are not already required to be stated on the label by Regulation (EC) No 1272/2008.

The information shall be clearly visible, easily legible and marked in a way that is indelible.

The information shall be written in the official language(s) of the Member State(s) where the mixture is placed on the market, unless the MemberState(s)concernedprovide(s)otherwise

Where necessary because of the size of the package, the information listed in the first subparagraph, except for point (a), shall be included instead in the instructions for use.

Before using a mixture for tattooing purposes, the person using the mixture shall provide the person undergoing the procedure with the information marked on the package or included in the instructions for use pursuant to this para- graph.

Mixtures that do not contain the statement "Mixture for use in tattoos or permanent make-up" shall not be used for tattooing purposes.

#### 15.2 Chemical Safety Assessment

Chemical safety assessments for substances in this mixture were not carried out.

#### SECTION 16: Other information

| Abbreviations and acronyms |   |  |
|----------------------------|---|--|
| Abbr.                      | Descriptions of used abbreviations  |  |
| 2000/39/EC                 | Commission Directive establishing a first list of indicative occupational exposure<br>limit values in impletation of Council Directive 98/24/EC |  |
| 2009/161/EU                |   |  |

according to Regulation (EC) No. 1907/2006 (REACH)

#### **Greinox POLISH**

| Abbr.            | Descriptions of used abbreviations  |
|------------------|---|
| 2017/2398/EC     | Directive of the European Parliament and of the Council amending<br>Directive 2004/37/EC on the protection of workers from the risks<br>related to exposure to carcinogens or mutagens at work                              |
| Acute Tox.       | Acute toxicity  |
| ADN              | Accord européen relatif au transport international des marchandises<br>dangereuses par voies de navigation intérieures (European Agreement<br>concerning the International Carriage of Dangerous Goods by Inland Waterways) |
| ADR              | Accord européen relatif au transport international des marchandises dangereuses<br>par route (European<br>Agreement concerning the International Carriage of Dangerous Goods by Road)                                       |
| ADR/RID/ADN      | Agreements concerning the International Carriage of Dangerous Goods by<br>Road/Rail/Inland Waterways (ADR/RID/ADN)  |
| ATE              | Acute Toxicity Estimate   |
| CAS              | Chemical Abstracts Service (service that maintains the most comprehensive list of chemical substances)  |
| Ceiling-C        | Ceiling value   |
| CLP              | Regulation (EC) No 1272/2008 on classification, labelling and packaging of<br>substances and mixtures   |
| CMR              | Carcinogenic, Mutagenic or toxic for Reproduction   |
| DGR              | Dangerous Goods Regulations (see IATA/DGR)  |
| DMEL             | Derived Minimal Effect Level  |
| DNEL             | Derived No-Effect Level   |
| EC50             | Effective Concentration 50 %. The EC50 corresponds to the concentration of a tested substance causing 50 % changes in response (e.g. on growth) during a specified time interval  |
| EC No            | The EC Inventory (EINECS, ELINCS and the NLP-list) is the source for the seven-<br>digit EC number, an identifier of substances commercially available within the EU<br>(European Union)                                    |
| EH40/2005        | EH40/2005 Workplace exposure limits, Table 1: List of approved workplace<br>exposure limits<br>(http://www.nationalarchives.gov.uk/doc/open-government-licence/)  |
| EINECS           | European Inventory of Existing Commercial Chemical Substances   |
| ELINCS           | European List of Notified Chemical Substances   |
| EmS              |   |
| ErC50            | Emergency Schedule<br>= EC50: in this method, that concentration of test substance which results in a 50<br>% reduction in either growth (EbC50) or growth rate (ErC50) relative to the<br>control                          |
| Eye Dam.         | seriously damaging to the eye   |
| Eve Irrit.       | irritant to the eve   |
| GHS              | "Globally Harmonized System of Classification and Labelling of Chemicals"<br>developed by the United Nations  |
| IATA<br>IATA/DGR | International Air Transport Association<br>Dangerous Goods Regulations (DGR) for the air transport (IATA)   |

| IMDG             | International Maritime Dangerous Goods Code   |

according to Regulation (EC) No. 1907/2006 (REACH)

# GREISING

#### **Greinox POLISH**

| Abbr.       | Descriptions of used abbreviations  |
|-------------|---|
| index No    | the Index number is the identification code given to the substance in Part 3 of<br>Annex VI to Regulation (EC) No 1272/2008   |
| IOELV       | indicative occupational exposure limit value  |
| MARPOL      | International Convention for the Prevention of Pollution from Ships (abbr. of<br>"Marine Pollutant)   |
| Met. Corr.  | corrosive to metals   |
| NLP         | No-Longer Polymer   |
| ppm         | parts per million   |
| PBT         | Persistent, Bioaccumulative and Toxic   |
| PNEC        | Predicted No-Effect Concentration   |
| REACH       | Registration, Evaluation, Authorisation and Restriction of Chemicals  |
| RID         | Règlement concernant le transport International ferroviaire des marchandises<br>Dangereuses (Regulations concerning the International carriage of Dangerous<br>goods by Rail) |
| Skin Corr.  | corrosive to skin   |
| Skin Irrit. | irritant to skin  |
| STEL        | short-term exposure limit   |
| SVHC        | Substance of Very High Concern  |
| TWA         | time-weighted average   |
| VOC         | Volatile Organic Compounds  |
| vPvB        | very Persistent and very Bioaccumulative  |
| WEL         | workplace exposure limit  |

#### Key literature references and sources for data

Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures. Regulation (EC) No. 1907/2006 (REACH), amended by 2020/878/EU.

Transport of dangerous goods by road, rail and inland waterway (ADR/RID/ADN). International Maritime Dangerous Goods Code (IMDG). Dangerous Goods Regulations (DGR) for the air transport (IATA).

#### **Classification procedure**

Physical and chemical properties. The classification is based on tested mixture. Health hazards. Environmental hazards. The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

| List of relevant phrases (code and full text as stated in chapter 2 and 5) |   |  |
|--|---|--|
| Code   | Text                                    |  |
| H290   | may be corrosive to metals              |  |
| H302   | Harmful if swallowed.                   |  |
| H314   | causes severe skin burns and eye damage |  |
| H318   | causes serious eye damage               |  |

#### List of relevant phrases (code and full text as stated in chapter 2 and 3)

#### Training advice

Provide adequate information, instruction and training for operators.
