according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Information on the product / trade name:

**Greinox S Pickling Spray Gel** 

1.2 Relevant identified uses of the substance or mixture and uses advised against

for Surface treatment, only for industrial use

**REACH Registration Number:** 

not relevant (mixture)

1.3 Details of the supplier of the safety data sheet

Information on the manufacturer / supplier:

Kai Greising e. K. Clean Marker

Industriestraße 29/2 73340 Amstetten

**Germany** 

<u>phone:</u> 0049-7331-3058-0 <u>fax:</u> 0049-7331-981722

1.4 Emergency telephone number

| Name                | Street    | Postal code/ city | Telephone    | Website |
|---------------------|-----------|-------------------|--------------|---------|
| National Poisons    | Dudley Rd | B187QH            | 844 892 0111 |         |
| Information Service |           | Birmingham        |              |         |
| City Hospital       |           |                   |              |         |

Emergency information service Germany +49-761-19240

### **SECTION 2: Hazards identification:**

### 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

### CLP/GHS Classification (1272/2008):

Metal Corrosion Category 1; H290

Acute Toxicity Category 2; H310

Acute Toxicity Category 3, H301

Acute Toxicity Category 3, H331

Skin Corrosion Category 1, H314

Eye Damage Category 1, H318

### 2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms

Contains: Nitric Acid, Hydrofluoric Acid

Signal word Danger

#### **Hazard Phrases:**

H290 May be corrosive to metals.

H301 + 331 Toxic if swallowed and if inhaled.

H310 Fatal in contact with skin

H314 Causes severe skin burns and eye damage.

### **Precautionary statements**

### **Precautionary statements - prevention**

P233 Keep container tightly closed.

P234 Keep only in original packaging.

Revision Date: January 2024 page 1/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

P260 Do not breathe vapor, mists or spray.

P262 Do not get in eyes, on skin, or on clothing.

P280 Wear protective gloves, protective clothing, eye protection and face protection.

P284 In case of inadequate ventilation, wear respiratory protection.

P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor.

P320 specific treatment is urgent

### Special labeling of certain mixtures

EUH071 corrosive to the respiratory tract.

#### 2.3 Other hazards

During the for Surface treatment electrolyte vapors may form

### .....

### **SECTION 3: Composition/information on ingredients**

#### 3.1 Substances

not relevant (mixture)

#### 3.2 Mixture

Description of the mixture

Revision Date: January 2024 page 2/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

### **Remarks**

For full text of Hazard- and EU Hazard-statements: see SECTION 16.

PBT/vPvB: Not applicable for inorganic substances

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

#### **General notes**

Take off immediately all contaminated clothing.

First aiders: pay attention to self-protection! Remove the affected persons from the danger area and lay them down. Avoid splashing. Avoid direct contact with eyes, skin or clothing. Wear thick protective clothing. Remove contaminated clothing immediately. Call in a doctor immediately. Move those affected out of the danger area. Pay attention to protecting first responders. In case of unconsciousness place and transport in stable sideways position. Even if poisoning is suspected, a medical assessment is required. Symptoms of poisoning can only appear many hours later, so medical observation should be carried out for at least 48 hours after the accident.

### Following inhalation

If breathing difficulties or respiratory arrest occur, initiate artificial respiration. No mouth-to-mouth or mouth-to-nose ventilation. Use resuscitator or respirator. Call in a doctor immediately. If you inhale vapors or spray mist, seek medical advice immediately. Take the affected person into fresh air. After inhalation, take calcium tablets as if in contact with skin. If you have difficulty breathing, have your body inhale oxygen and keep your body calm.

### Following skin contact

Get medical attention immediately. In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Cold water may be used. Material is absorbed through the skin. While waiting for medical attention, it has been shown that flushing the affected area with water for one minute and then massaging HF Antidote Gel into the wound until there is a cessation of pain is a most effective first aid treatment. HF Antidote Gel contains Calcium Gluconate which combines with HF for insoluble Calcium Fluoride, thus preventing the extraction of calcium from the body tissue and bones. Another alternative first aid treatment, after thorough washing of the burned area, is to immerse the burned area in a solution of 0.2% iced aqueous Hyamine 1622 or 0.13% iced aqueous Zephiran Chloride. If immersion is impractical, towels could be soaked with one of the above solutions and used as compresses for the burn area. Hyamine 1622 is a trade name for Tetracaine Benzethonium Chloride. Zephiran is a trade name for Benzalkonium Chloride. In case of over-sized skin burns (approx. 150 cm²), additionally let 6 calcium effervescent tablets (400 mg calcium per tablet) be dissolved in water. This is to be repeated every 2 hours until reaching the hospital.

### Following eye contact

In case of eye contact, rinse with plenty of water for at least 15 minutes and seek medical attention immediately. Cold water may be used. Keep the eyelids apart and away from the eyeballs during irrigation. Do not use oily drops or ointment or HF skin burn treatments on the eyes. Get medical attention immediately, preferably an eye specialist. Place ice pack on eyes until reaching emergency room.

### Following ingestion

Do Not Induce Vomiting! Never give anything by mouth to an unconscious person. If conscious, wash out mouth with water. Get medical attention immediately.

### 4.2 Most important symptoms and effects, both acute and delayed

Causes severe irritation and burns to eyes and skin. Skin damage can occur without noticeable pain. Can be absorbed through the skin in fatal amounts. Inhalation may cause severe

Revision Date: January 2024 page 3/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

respiratory irritation or burns with coughing or labored breathing. May cause lung damage. May be toxic if swallowed. May cause severe burn to the mouth, throat or stomach. Symptoms may be delayed.

### 4.3 Indication of any immediate medical attention and special treatment needed

Medical treatment is required for all incidents of contact or exposure.

Contact your Poison Center for the latest advice on treatment. For eye contact: Carefully evaluate for eye damage, exposure to dilute solutions may result in delayed symptoms of ocular damage. For skin contact: Decontamination of the contact area is of primary importance. Symptoms may be delayed for several hours. Specific treatment is controversial with no single treatment clearly superior. Hexafluorine®, topical calcium gluconate gel or magnesium oxide paste have been successful. Hexafluorine® applied immediately to the skin may remove excess chemical from the surface of the tissue before it has a chance to penetrate. Calcium gluconate infiltration may be considered in some cases. Systemic absorption may occur and may require treatment with parenteral calcium salts. For ingestion: Administer fluoride binding substance. Consider nasogastric or soft orogastric suction and lavage with 10% calcium gluconate if the ingestion is recent and spontaneous emesis has not occurred. Monitor and treat hypocalcemia and hypomagnesemia, parenterally as needed. Observe and evaluate patient for oral and GI burns. For inhalation: Monitor for respiratory distress. Respiratory symptoms may be delayed up to 24 hours.

### **SECTION 5: Firefighting measures**

### 5.1 Extinguishing media

### Suitable extinguishing media

Coordinate fire-fighting measures to the fire surroundings water spray, foam, dry extinguishing powder, carbon dioxide (CO<sub>2</sub>)

### Unsuitable extinguishing media

water jet

### 5.2 Special hazards arising from the substance or mixture

Not combustible.

### **Hazardous combustion products**

In case of fire may be liberated: nitrogen oxides (NOx), May produce toxic fumes of carbon monoxide and hydrogen fluoride if burning.

### 5.3 Advice for firefighters

Fight fire with normal precautions from a reasonable distance. Wear self-contained breathing apparatus. Wear full chemical protective clothing. Contact with alkalies and metals may evolve flammable hydrogen gas.

### **Further information**

Suppress (knock down) gases/vapors/mists with a water spray jet. Prevent fire extinguishing water from contaminating surface water or the ground water system.

### **SECTION 6: Accidental release measures**

### 6.1 Personal precautions, protective equipment and emergency procedures

### Advice for non-emergency personnel

Wearing of suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. Avoid contact with skin, eyes and clothes. Do not breathe vapour/spray.

Revision Date: January 2024 page 4/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

Wash thoroughly after handling.

Advice for emergency responders: Protective equipment see section 8.

### 6.2 Environmental precautions

Avoid release into the environment. Report spill as required by local and national regulations.

### 6.3 Methods and materials for containment and cleaning up

Evacuate spill area. Wear appropriate protective clothing and equipment to prevent contact. Dike spill with an absorbent materials and prevent spill from entering sewers and waterways. Collect into appropriate containers for disposal. Wash spill area with water.

### Advices on how to clean up a spill

Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents).

### Other information relating to spills and releases

Place in appropriate containers for disposal. Ventilate affected area.

#### 6.4 Reference to other sections

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section 13.

### **SECTION 7: Handling and storage**

### 7.1 Precautions for safe handling

Prevent eye and skin contact. Do not breathe vapors or mists. Do not eat, drink or smoke when using this product. Use only with adequate ventilation and appropriate protective clothing. Immediately remove contaminated clothing and other items for disposal. Wash thoroughly after handling. This product can cause severe burns, tissue damage and absorption of potentially fatal amounts without pain. Immediately decontaminate all contact areas and get medical attention. Empty containers retain product residues. Follow all SDS precautions in handling empty containers.

### 7.2 Conditions for safe storage, including any incompatibilities

Protect containers from physical damage. Store in a cool, well-ventilated area away from alkalies and acids. Do not store in metal containers. Keep in original containers.

#### Consideration of other advice

Ventilation requirements

Use local and general ventilation.

Specific designs for storage rooms or vessels

Recommended storage temperature: 15 – 25 °C.

### 7.3 Specific end use(s)

Industrial uses: Surface Treatment for Welded Surfaces for Stainless Steel and Nickel Alloys Professional uses: Surface Treatment for Welded Surfaces for Stainless Steel and Nickel Alloys

### **SECTION 8: Exposure controls/personal protection**

### 8.1 Control parameters

#### **National limit values**

### 8.2 Exposure controls

**Recommended Monitoring Procedures:** Collect on silica gel tubes and analyze by IC. Refer to professional industrial or occupational hygienist for sampling and analytical methods. Certain regulations require periodic monitoring.

**Appropriate Engineering Controls:** Use with adequate general or local exhaust ventilation to minimize exposure levels. Refer to ANSI Z49.1 and other applicable regulations for additional information

### Individual protection measures (personal protective equipment)

### **Eye/face protection**

Use safety goggle with side protection. Wear face protection.

### Skin protection

### hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the

Revision Date: January 2024 page 6/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

supplier of these gloves. The times are approximate values from measurements at 22 ° C and permanent con- tact. Increased temperatures due to heated substances, body heat etc. and a reduction of the effective layer thickness by stretching can lead to a considerable reduction of the breakthrough time. If in doubt, contact manufacturer. At an approx. 1.5 times larger / smaller layer thickness, the respective breakthrough time is doubled / halved. The data apply only to the pure substance. When transferred to substance mixtures, they may only be considered as a guide.

### · type of material

Chloropren

### material thickness

1.2 mm

### • breakthrough times of the glove material

>480 minutes (permeation: level 6)

### • other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended.

### **Respiratory protection**

If exposures limits are exceeded, wear an approved full facepiece particulate respirator, supplied air respirator (with escape bottle if required) or self-contained breathing apparatus may be required. Selection of respiratory protection depends on the contaminant type, form and concentration. Select in accordance with applicable regulations and good Industrial Hygiene practice.

Respiratory protection necessary at: Aerosol or mist formation. Type: NO-P3 (against nitrous gases and particles, colour code: Blue/White).

### **Environmental exposure controls**

Keep away from drains, surface and ground water.

### **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

### **Appearance**

Form gel like fluid Colour colorless

Odour Characteristic (pungent)
Odour Threshold 0,036 ppm Hydrofluric acid)

### Other physical and chemical parameters

pH ~1,2

Melting point 0°C at 1.013 hPa

Boiling point ~110°C

Flash point not determined

Evaporation rate

Flammability (solid, gas)

Lower explosion limit

Upper explosion limit

Vapour pressure

Relative vapour density

Viscosity, dynamic No information available.

Revision Date: January 2024 page 7/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

Explosive properties Not classified as explosive.

Oxidizing properties none

9.2 Other data

Corrosion May be corrosive to metals.

### **SECTION 10: Stability and reactivity**

### 10.1 Reactivity

Contact with light-metals liberates hydrogen

### 10.2 Chemical stability

The material is stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

### 10.3 Possibility of hazardous reactions

Reacts with metals to form flammable hydrogen gas. Reacts with bases to produce heat.

#### 10.4 Conditions to avoid

Heating > 35°C, or direct sunlight, frost

### 10.5 Incompatible materials

Aluminium, iron/iron-containing compounds, Mild steel, bases, metals, glass

### 10.6 Hazardous decomposition products

Decomposition may produce hydrogen fluoride and oxides of carbon and nitrogen.

### SECTION 11: Toxicological information

### 11.1 Information on toxicological effects

Test data are not available for the complete mixture.

**Chronic Toxicity**: Prolonged or repeated exposure to fluorides may cause mottling of teeth, damage to bones and fluorosis with symptoms including brittle bones, weight loss, anemia, calcified ligaments and joint stiffness.,

### **Acute toxicity:**

Fatal if swallowed. Fatal in contact with skin. Fatal if inhaled.

| Acute toxicity estimate (ATE) of components |           |                         |                 |         |  |  |
|---|-----------|-------------------------|-----------------|---------|--|--|

**Skin corrosion/irritation:** Nitric acid and hydrofluoric acid are corrosive to rabbit skin. This product is corrosive to the skin.

**Eye damage/ irritation:** Nitric acid and hydrofluoric acid are corrosive to rabbit eyes. This product is corrosive to the eyes.

**Respiratory Irritation:** No data available. This product is expected to cause respiratory irritation or corrosion to the lungs.

**Respiratory Sensitization:** None of the components are respiratory sensitizers.

**Skin Sensitization:** None of the components have been shown to cause skin sensitization in animals or humans.

**Germ Cell Mutagenicity:** None of the components have been shown to cause mutagenic activity.

Revision Date: January 2024 page 8/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

**Carcinogenicity:** None of the components are listed as a carcinogen or suspected carcinogen by EU CLP.

**Reproductive Toxicity:** None of the components have been shown to cause reproductive or developmental toxicity.

### **Specific Target Organ Toxicity:**

**Single Exposure:** Shall not be classified as a specific target organ toxicant (single exposure). **Repeat Exposure:** Shall not be classified as a specific target organ toxicant (repeated exposure).

**Aspiration hazard**No data available

### If swallowed

Corrosive to the mucous membranes of the mouth, throat and stomach. May cause fluoride poisoning with symptoms including weakness, tremors, shallow breathing, spasms of the hands and feet, convulsions and coma. May cause central nervous system, kidney and cardiovascular (heart rhythm) effects. Respiratory paralysis may cause death.

#### • If in eyes

Causes severe irritation or burns with redness, tearing and pain. Permanent damage including blindness may occur.

#### If inhaled

Mist and vapors may cause burns to the respiratory with coughing and labored breathing. May cause fluoride poisoning with effects similar to those listed under "ingestion". Symptoms may be delayed. Harmful if inhaled. Medical treatment is required for all incidents of contact or exposure.

#### • If on skin

Contact may cause severe irritation or burns to the skin. Burns may not be immediately painful or visible. Diluted solutions can also produce severe burns, but without causing immediate pain. Sometimes pain may be felt several hours later when hydrofluoric acid has penetrated into underlying tissues. May be fatal absorbed through the skin with symptoms similar to those listed under ingestion.

### 11.1 Endocrine disrupting properties

Does not contain an endocrine disruptor (ED) in a concentration of  $\geq 0.1\%$ .

### 11.3 Further information

There is no additional information.

## **SECTION 12: Ecological information**

### 12.1 Toxicity

Shall not be classified as hazardous to the aquatic environment.

### **Ingredient Aquatic Toxicity Values**

Nitric Acid: 96 hr LC50 chinook 4,400 mg/L, 48 hr EC50 Ceriodaphnia dubia 4.4 mg/L Hydrofluoric Acid: 96 hr LC50 fish 51 mg/L, 48 hr EC50 daphnia magna 97 mg/L During use, the pickling paste will absorbed oxidized metals and contaminents from the welding process which may include Chromium VI, nickel, manganese and other toxic metals. It is the responsibility of the user to determine the chemical content of the waste generated and to ensure proper disposal in accordance with all local and national regulations.

### 12.2 Process of degradability

The methods for determining the biological degradability are not applicable to inorganic substances

### 12.3 Bioaccumulative potential

The fluorides from this product is expected to accumulate predominately in the exoskeleton of crustacea and in the skeleton of fish. Test show there was no accumulation in the edible tissues.

#### 12.4 Mobility in soil

Data are not available

Revision Date: January 2024 page 9/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

### 12.5 Results of PBT and vPvB assessment

Does not contain a PBT-/vPvB-substance in a concentration of ≥ 0.1%.

### 12.1 Endocrine disrupting properties

Does not contain an endocrine disruptor (ED) in a concentration of  $\geq 0.1\%$ .

### 12.7 Other adverse effects

Data are not available.

### SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

This material and its container must be disposed of as hazardous waste. Dispose of contents/container in accordance with local/regional/national/international regulations.

### Sewage disposal-relevant information

Do not empty into drains.

### Waste treatment of containers/packaging

It is a dangerous waste; only packaging which are approved (e.g. acc. to ADR) may be used.

### Sewage disposal-relevant information

Do not empty into drains.

### 13.2 Relevant provisions relating to waste

The allocation of waste identity numbers/waste descriptions must be carried out according to the EEC, specific to the industry and process.

### Properties of waste which render it hazardous

HP 4 irritant - skin irritation and eye damage

HP 6 acute toxicity

HP 8 corrosive

### 13.3 Remarks

Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities. Please consider the relevant national or regional provisions

### **SECTION 14: Transport information**

**14.1** UN number **2922** 

**14.2** UN proper shipping name Corrosive liquid, toxic, n.o.s. Hazardous ingredients (nitric acid, hydrofluoric acid,)

14.3 Transport hazard class(es)

8 + 6.1 Class

**14.4** Packing group

**14.5** Environmental hazards none (non-environmentally hazardous acc. to the dangerous goods regulations)

### 14.6 Special precautions for user

Attention: Toxic, strongly corrosive

### 14.7 Transport in bulk according to Annex II of MARPOL and the IBC Code

Not applicable – product is transported only in packaged form.

Revision Date: January 2024 page 10/15

according to Regulation (EC) No. 1907/2006

### **Greinox S Pickling Spray Gel**

### 14.8 Information for each of the UN Model Regulations

### • Transport of dangerous goods by road, rail and inland waterway (ADR/RID/ADN)

UN number 2922

Proper shipping name Corrosive liquid, toxic, n.o.s.

Particulars in the transport document UN2922, (hydrofluoric acid, nitric acid) 8 + 6.1, II, (E)

Class 8
